

“We wanted to make sure that parents could be a part of the learning and not be afraid of machines as they entered the home space,” says T.J. McCray, director of instructional technology and library media services for MMSD.

“As a parent, I needed to ensure that other parents were comfortable. We did that through an additional layer of product support.”

McCray held district-wide sessions to inform parents about the Chromebooks and share how they could set boundaries when the devices came home. “We told families all about the Securly safety components, showed them how they worked, and walked them through how to manage the security on their phones.”

The district also hosted training sessions at most of the high schools, which were very well attended. “Securly allows parents to have a seat at the table regarding how the technology will be used at home, and that is so important,” says McCray. “For instance, if families don’t want their kids on social media they can block access at home. They don’t even have to touch the device—they can set limits from their phones.”

For MMSD, letting parents regulate technology usage improves the home-school connection and allows the district to continue to make the best use of technology to enhance student learning. “Our administration feels safe and able to be proactive and our teachers feel in control of their classes. It’s a win-win for everyone,” says McCray.

Taking classroom learning to the next level

Students and families aren’t the only ones benefiting from the new products. Teachers have also enjoyed stronger classroom management, thanks to Securly Classroom. “We started without any kind of management tool and teachers had difficulty keeping students off YouTube, Amazon Prime, and other sites. We needed to find a way for teachers to have more control to keep students on task and productive,” says Benedict.

According to Benedict, MMSD first experimented with a couple of other products, which proved to be either too expensive or ineffective. The district was happy to try Classroom, especially because it was part of the Securly package and they were already impressed with the quality of Filter.

Benedict says he's received very positive feedback about Classroom. "Teachers can see their students' screens and close tabs on an individual student's device to prevent distractions. It's an invaluable tool for teachers in the modern age."

Everyone at MMSD appreciates Classroom's ease of use. Once teachers had a little bit of training and saw what it could do, they were on board. Most of the 3,000 classroom teachers are using it, especially in the middle schools, where students struggle the most with time management and self-awareness.

Teachers tell Benedict that they love the scheduling component, which allows them to pre-set student monitors to run at certain times. "They can see the report after the class and use what they find to have a conversation about appropriate use," he says. "Lots of teachers use it as a data-collecting tool."

As the district continues to figure out how to best leverage technology to enforce effective teaching and learning, they know that ongoing training and support are key. "Technology can and should be used to ensure that our mission is fulfilled," says McCray. "What role will it play? What does that look like?"

For now, the plan is to continue educating teachers, parents, and staff on how to fulfill the MMSD mission, help every school to thrive, and prepare all students for college, career, and community.

About Madison Metropolitan School District (MMSD)

MMSD is an urban district that is close to the University of Wisconsin-Madison. It is the second-largest district in the state of Wisconsin.

27,000

Students

2,760

About Securly

Securly was founded in 2013 with a single intention to keep kids safe online. Securly develops solutions that keep kids safe & engaged online, at school, and at home. From tools that help adults create a kid-friendlier Internet, to an AI that recognizes signs of bullying and even intuitively risks of self-harm, Securly breaks new ground and innovates to meet modern problems head-on. For every child that we empower to stand strong, for each kid that chooses hope over hopelessness, Securly is motivated to continue forging ahead.
